Performance distribution

The chart shows how the performance of top universities as a group changed over the year, and how it affected your relative position, across the 13 metrics against the worldwide performance distribution. The first boxplot shows your performance last year, plotted against last years performance distribution. The second one is your performance this year, plotted against this years distribution. The third one is your performance this year, plotted against the this years performance distribution, but using only universities present in last years ranking.

Metrics: Doctorate to bachelor awarded

Contributing factors

The following chart shows you a breakdown of changes at your metrics level that contribute toward the change in overall score. The red bars indicate metrics that deteriorated in performance while the green ones represent metrics that improved. The sizes of bars represent a combination of the amount of change of the metrics and the weights given to those metrics. The blue bar at the end represents the change of your overall score. You can see either your own performance or that of one of your peers using the drop down selector.

Institution: Covenant University
