**A THESIS SUBMITTED TO THE SCHOOL OF POSTGRADUATE
STUDIES IN PARTIAL FULFILMENT OF THE REQUIREMENTS FOR
THE AWARD OF DEGREE OF DOCTOR OF PHILOSOPHY (Ph.D) IN
THE DEPARTMENT OF BUSINESS MANAGEMENT, COLLEGE OF
MANAGEMENT AND SOCIAL SCIENCES, COVENANT UNIVERSITY,
OTA, OGUN STATE, NIGERIA**

NOVEMBER, 2021

ACCEPTANCE

This is to attest that this Thesis is accepted in partial fulfilment of the requirements for the award of the degree of the Doctor of Philosophy in Business Administration in the Department of Business Management, College of Management and Social Sciences, Covenant University, Ota, Nigeria.

Mr. John A. Philip
Secretary, School of Post Graduate Studies

Signature and Date

Prof. Akan B. Williams
Dean, School of Post Graduate Studies

Signature and Date

DECLARATION

I, **EMIELU, EMMANUEL TAYO (18PAB01812)** declare that this research work was carried out by me under the supervision of Prof. Rowland E. Worlu and Prof. Chinonye L. Moses of the Department of Business Management, College of Management and Social Sciences, Covenant University, Ota, Ogun State, Nigeria. I attest that the thesis has not been presented either wholly or partly for the award of any degree elsewhere. All sources of data and scholarly information used in this thesis are dully acknowledged.

EMIELU, EMMANUEL TAYO

Signature and Date

CERTIFICATION

We certify that the thesis title, ‘**DIGITAL BUSINESS TRANSFORMATION AND COMPETITIVENESS OF OIL AND GAS TRAINING FIRMS IN NIGERIA**’ is based on original research carried out by Emielu, Emmanuel Tayo under our supervision and that it has not been submitted for the award of any degree in this or any other University.

Prof. Rowland E Worlu
Supervisor

DEDICATION

I dedicate this work to the glory of God Almighty, who gives mortal man the power for extraordinary accomplishments and to Viano, in the hope that it will inspire him to go early for his Ph.D. when he comes of age, and not delay till old age like his grandfather did.

ACKNOWLEDGMENTS

I am thankful to God Almighty who appointed the vision for this time and has now brought it to pass, through the mercies of my Lord and Saviour, Jesus Christ. I am grateful to the visionary Chancellor of this great citadel of learning, Dr. David O. Oyedepo for giving me the platform to realise this my long-held dream, the same great platform that had earlier released two of my children to soar as kings and queens in the world!

I have been particularly blessed to have numerous helpers, coaches, tutors, friends, families, and critics, without whose efforts and encouragement, I would not have attained to this academic milestone of my life. For the economy of space, a few of them are mentioned here.

My special appreciation goes to the Vice-Chancellor of Covenant University, Prof. Abiodun H. Adebayo, the Registrar, Dr. Oluwasegun P. Omidiora, and the Dean of School of Postgraduate Studies, Prof. Akan B. Williams. My warmest appreciation also goes to Dr. Emmanuel O. Amoo, the Sub-Dean of School of Postgraduate Studies, Prof. Uwalomwa Uwuigbe, the Dean of College of Management and Social Sciences, and Prof. Anthonia A. Adeniji, the Head of the Department of Business Management.

I am immensely grateful and obligated to my Supervisors, Prof. Rowland E. Worlu and Prof. Chinonye L. Moses, who provided the painstaking guidance, coaching, and encouragement to see this work from its awkward beginnings to this stage where I am proud to present it to the world. Their dedication to discipline and excellence has made a deep impact on my scholarly orientation and world view.

I am grateful for the invaluable support and priceless intellectual contributions of Dr. Olaleke O. Ogunnaike, Dr. Joseph O. Kehinde, Dr. Adewale O. Osibanjo, Dr. Edith E. Igbino, Dr. Omotayo A. Adegbuyi, Dr. Itai M. Muktar, and Dr. Mercy E. Ogbari. My thanks also go to Dr. Hezekiah O. Falola, Dr. Daniel E. Ufua, Dr. Odunayo P. Salau, Dr. Ayodotun S. Ibidunni, Dr. Adebukola E. Oyewunmi, and Mrs. Eberé A. Azuh.

I thank Tina Aigbedion, Iseoluwa Ogundele, Steve Ayuba, Benjamin Abejuasun, Tope Olowe, Enyi Ogonnaya, Steve Odjugo, and Dr. Bede Nwete for being more than friends to me. Special thanks to my course mates, Mary Ezema, Emmanuel Okoh, Stanley Ajalie, Ayo Omolade, and Kemi Alake for their awesome love and friendship.

Finally, I acknowledge my dear family, led by the matriarch and dear wife, Elohor, the children, Mamuzo, Koyejo, Demola, Maro, Kome, Zino, Ronke, and Sarah for their encouragement,

moral support, and prayers. My second-generation children have been amazing, teaching me learning to learn, as I went through this programme. This is to Viano and mates.

ABSTRACT

This thesis examined the effect of digital business transformation on competitiveness of corporate training firms in a developing economy environment. The pervasive and rapid rate of digital disruption motivates diverse organisations to leverage digital capabilities for competitive survival. However, the effect of digital capabilities on competitiveness does not seem to be fully captured yet. In this study, the explanatory power of digital sensing, digital seizing, digital re-configuration, digital adoption, and digital infrastructure was examined with respect to competitive intelligence, distinctive competence, innovativeness, customer value orientation, and service quality, as variables of competitiveness. Dynamic capability theory underpinned this research, supported by technology adoption and institutional theories. The methodology involved an online survey of 373 corporate training firms which was analysed using IBM SPSS 25 and Smart Partial Least Squares 3.0. The findings showed that digital business transformation has a significant effect on the competitiveness of the training firms surveyed. Particularly, the most significant and positive relationships were between digital sensing capability and competitive intelligence ($\beta = 0.879$, $R^2 = 0.772$, $t = 23.711 > 1.96$, $p = 0.000 < 0.05$), digital reconfiguration capability and innovativeness ($\beta = 0.884$, $R^2 = 0.781$, $t = 24.406 > 1.96$, $P = 0.000 < 0.05$), and between digital infrastructure and training service quality ($\beta = 0.880$, $R^2 = 0.774$, $t = 24.676 > 1.96$, $p = 0.000 < 0.05$). Besides, the study revealed that the training sector is experiencing increasing competitiveness which is likely to exacerbate with the trend towards online training. To boost competitiveness through digital transformation, corporate training firms should focus on strengthening their competitive intelligence, building distinctive competence, and driving innovativeness through digital sensing, seizing, and reconfiguration capabilities. In addition, by optimising their digital infrastructure acquisition and adoption, greater customer value orientation and service quality will be realized towards being more competitive in the face of digital disruptions. The study was limited to quantitative method and one business sector, which may be a basis for further research.

Keywords: Competitiveness; Corporate Training; Digital Business Transformation; Dynamic Capability
