(20PCM02102)**

**JULY, 2022**

**ARTIFICIAL INTELLIGENCE DRIVEN ENERGY MANAGEMENT OF  
A HYBRID MINI-GRID**

**BY**

**BELLO, ILESANMI OLUWAYOMI**

**(20PCM02102)**

**B.Eng. Mechanical Engineering, University of Ilorin, Ilorin.**

**A DISSERTATION SUBMITTED TO THE SCHOOL OF  
POSTGRADUATE STUDIES OF COVENANT UNIVERSITY, OTA,  
OGUN STATE, NIGERIA IN PARTIAL FULFILMENT OF THE  
REQUIREMENTS FOR THE AWARD OF MASTER OF ENGINEERING  
(M.Eng.) DEGREE IN MECHANICAL ENGINEERING, IN THE  
DEPARTMENT OF MECHANICAL ENGINEERING, COLLEGE OF  
ENGINEERING, COVENANT UNIVERSITY, OTA.**

**JULY, 2022**

## **ACCEPTANCE**

This is to attest that this dissertation is accepted in partial fulfilment of the requirements for the award of the degree of Master of Engineering in Mechanical Engineering in the department of Mechanical Engineering, College of Engineering, Covenant University, Ota, Nigeria.

**Mr. Taiwo B. Erewunmi**  
**(Secretary, School of Postgraduate Studies)**

**Signature and Date**

**Prof. Akan B. Williams**  
**(Dean, School of Postgraduate Studies)**

**Signature and Date**

## **DECLARATION**

I, **BELLO, Ilesanmi Oluwayomi (20PCM02102)** declares that this research work entitled “**ARTIFICIAL INTELLIGENCE DRIVEN ENERGY MANAGEMENT OF A HYBRID MINI-GRID**” was carried out by me under the supervision of Prof. Olayinka Sunday Ohunakin of the department of Mechanical Engineering, College of Engineering, Covenant University, Ota, Nigeria. I attest that this dissertation has not been presented either wholly or partially for the award of any degree elsewhere. All sources of data and scholarly information used in this dissertation are duly acknowledged.

**BELLO ILESANMI OLUWAYOMI**

**Signature and Date**

## **CERTIFICATION**

This is to certify that the research work titled “**ARTIFICIAL INTELLIGENCE DRIVEN ENERGY MANAGEMENT OF A HYBRID MINI-GRID**” is an original research work carried out by **BELLO, ILESANMI OLUWAYOMI** meets the requirements and regulations governing the award of Master of Engineering (M.Eng.) degree in Mechanical Engineering, from the Department of Mechanical Engineering, College of Engineering, Covenant University, Ota, and is approved for its contribution to knowledge and literary presentation.

**Prof. Olayinka S. Ohunakin**

**(Supervisor)**

**Signature and Date**

**Prof. Joshua O. Okeniyi**

**(Head of Department)**

**Signature and Date**

**Prof. Chigbo A. Mgbemene**

**(External Examiner)**

**Signature and Date**

**Prof. Akan B. Williams**

**(Dean, School of Postgraduate School)**

**Signature and Date**

## **DEDICATION**

I dedicate this work to my superhero, my dad, for his unfathomable support and cheering from day one.

## ACKNOWLEDGEMENT

My profound appreciation goes to Almighty God for His unending supplies – material and immaterial thus far. A special acknowledgment to the Holy Spirit for His constant stream of inspiration all through this project work.

I also wish to appreciate parents and siblings for their support and cheering throughout this program.

I also wish to appreciate the leadership and management of Covenant University for the conducive environment and resources that have enabled me learn current and applicable knowledge rightly positioning me as a leader in the industry.

I also wish to appreciate the department of Mechanical Engineering; teaching and non-teaching staff, for their invaluable input and impact; special mentions: Prof. O. Ajayi, Dr. O. Omotosho, Dr. Mrs. Joseph, Prof. S. Oyedepo, Dr. Enesi for their large hearts and intentionally communicating their wealth of academic experience in teaching, research, and mentoring.

I also wish to appreciate Prof. O. S. Ohunakin, my project supervisor for taking the time out of his very busy schedule to supervise this project and ensure it comes out right.

I will also appreciate the entire class of 2020/21 Alpha semester set of MEng. Mechanical Engineering students; especially, our indefatigable college rep, Ayoola Daniel, you have a heart of gold!

A special thank you to Rubitec officials; Pelumi and Taiwo, for their warmth and support all through this work.

I will also appreciate Rabiya Ohunene, my academic senior and Emmanuel Daranijo for their invaluable contributions to this work despite their very busy schedules.

Another thank you to Morufdeen Atilola, “my Fuzzy logic consultant” and an astute academic. Thank you for the many times we had to review the algorithms and their results.

A special thank you to my very good friends, Egbo God’spower, Iyebiye, Similoluwa and Victory for their varying and various degrees of contributions and support throughout this work.

I will not forget to appreciate my boss at work, other senior colleagues and the entire '21 set of Lafarge Africa Plc Graduate Trainee set; fantastic people with ingenious minds, who had made it very easy and possible to complete this dissertation in due course.

## **ABSTRACT**

With the driving theme of sustainability in our world today, it is imperative to consider approaches to reduce the carbon footprint on a global scale.

One critical area is in the generation and distribution of energy supply. In the management of energy, various methodologies have been implemented especially in the area of Demand Side Management where a lot of research work has been done.

However, while it is very important for the consumer to be very efficient in their consumption of energy, it is also quite critical that energy supply is properly managed such that even though the demand is optimized, the supply also needs to be properly optimized to avoid energy wastage.

This work has contributed to the ongoing research for Supply Side Management by adopting two heuristic artificial intelligence models – Fuzzy logic for intelligent decisions and Genetic Algorithm (GA) for optimizing the energy supplied to consumers. The fuzzy logic helps in predicting the demand and optimizing it for the required supply while the GA helps to clean up the minimization function for the optimization of the supply of energy.

This model is applicable to any energy system – on-grid and off-grid application.
