DEDICATION

This research work is dedicated to God, the giver of wisdom, knowledge, understanding and strength who provided supernaturally all through this programme. To him alone be all the glory.

ACKNOWLEDGEMENTS

First and foremost, my profound gratitude goes to Almighty God for the gift of life, unusual strength, guidance, and grace to complete this project.

I recognize and appreciate the Chancellor of Covenant University, Dr. David O. Oyedepo for the spiritual ambience, vision and for constantly giving out time both to challenge my potentials in God and to provoke me in the school of exploits. I also appreciate the management team of Covenant University ably led by the Vice Chancellor, Professor Abiodun H. Adebayo, the Ag. Registrar, Mrs. Regina Tobi David, the Dean School of Post Graduate Studies, Professor Akan B. Williams, the Sub-dean, Dr. Emmanuel O. Amoo, and the Dean, College of Management and Social Sciences Professor Abiola A. Babajide for their support, for performing their duties efficiently. I would like to recognize the leadership of the Department ably led by Professor Anthonia J. Adeniji. I appreciate you for your tireless service, encouragement and support and motherly care for myself and my colleagues.

I deeply appreciate my God-sent supervisor in person of Professor Oladele J. Kehinde, who doubles as my academic coach and mentor. I thank you greatly for your support, constant push, words of encouragement and direction throughout the course of the project study. Thank you, sir, for sharing out of your knowledge bank and for being a thorough guardian on this journey, my utmost appreciation sir.

I also appreciate the incumbent PG Coordinator of the Department, Dr. Hezekiah Falola, for his administrative support. I also appreciate the kind gestures of Professor Rowland Worlu, Dr. Mercy E. Ogbari, Dr. Mayowa G. Agboola, Professor Omotayo Osibanjo, Professor Chinonye L. Moses, Dr. Daniel E. Ufua, and specifically Dr. Salau O.P. thank you for the support and love sir, you are greatly appreciated and all other great faculty members of the Business Management Department. Thank you for the support all through the course of this programme.

I sincerely appreciate my friends, course mates and those that I came across on this academic journey, for their support and prayers all through the period of this research, thank you. I also appreciate all members of the Postgraduate Student Council 2022/2023.

I express my profound gratitude to my parents, Mr. Felix Soba Adesina and Mrs. Marian Modupeola Adesina, for being my support and for their relentless prayers, sacrifices, efforts, and encouragement. I also express heartfelt gratitude to my husband, Engineer Ifeoluwapo Babajimi-Joseph for his constant and relentless support, sacrifices and literally walking with me throughout this MBA program. To my siblings, Aderonke, Adebukola and Adesola, thank you for your continuous support and constant push that I can always be better. To my children, Emmanuel Babajimi-Joseph and David Babajimi-Joseph, I love you so very much.

ABSTRACT

The main purpose of this research was to investigate the effect of credit management on the business sustainability of selected biomedical firms in Lagos, Nigeria. Small and medium-sized enterprises (SMEs) can increase their profits through trade credit, a financing arrangement that allows buyers to make purchases on credit terms. However, inappropriate trade credit management has been a challenge for many small business owners, particularly in the biomedical industry in Lagos, Nigeria. This study aimed to address this gap and explore the impact of credit management on business sustainability. The problem identified in this research is the lack of strategies among small business owners to achieve profitability within the first five years of launching their businesses due to inadequate trade credit management. Insufficient liquidity resulting from bad debts and delayed client payments has been a significant factor contributing to the failure of small businesses globally. While previous studies have focused on financing and account payables, there is a scarcity of research on account receivables and trade credit in the context of the supply of goods on credit. The investigation was conducted in selected biomedical firms located in Lagos state. A descriptive research approach was employed, and 162 out of 169 distributed questionnaires were returned, resulting in a high response rate of 95.86%. Statistical analysis using tools such as Statistical Packages for the Social Sciences (SPSS) and SEM-PLS (Structural Equation Model) was employed to analyze the collected data and test various hypotheses. The findings revealed significant impacts of credit management policies on growth, credit risk management strategies on liquidity, customers' creditworthiness on profitability, and trade credit on customer satisfaction. These results suggest that credit management has a significant effect on the business sustainability of the selected biomedical firms. Based on the study's findings, it is recommended that organizations should enhance their credit management policies; organizations need to strengthen their credit risk management strategies; emphasize customer creditworthiness and optimize trade credit practices. Implementing these recommendations will enable firms to improve their credit management practices, drive business growth, and enhance overall sustainability.

Keywords: Biomedical firms, Business sustainability, Credit management, Small and medium-sized enterprise, Trade credit.
