CONTENTS

This journal is a member of and subscribes to the principles of the Committee on Publication Ethics
As a subscriber to this journal, you can benefit from instant, electronic access to this title via Emerald Management eJournals. Your access includes a variety of features that increase the value of your journal subscription.

How to access this journal electronically
Our liberal institution-wide licence allows everyone within your institution to access your journal electronically, making your subscription more cost-effective. Our web site has been designed to provide you with a comprehensive, simple system that needs only minimum administration. Access is available via IP authentication or username and password.

To benefit from electronic access to this journal, please contact support@emeraldinsight.com. A set of login details will then be provided to you. Should you wish to access via IP, please provide these details in your e-mail. Once registration is completed, your institution will have instant access to all articles through the journal’s Table of Contents page at www.emeraldinsight.com/0263-7472.htm. More information about the journal is also available at www.emeraldinsight.com/pm.htm

Emerald online training services
Visit www.emeraldinsight.com/help and take an Emerald online tour to help you get the most from your subscription.

Key features of Emerald electronic journals
Automatic permission to make up to 25 copies of individual articles
This facility can be used for training purposes, course notes, seminars etc. within the institution only. This only applies to articles of which Emerald owns copyright. For further details visit www.emeraldinsight.com/copyright

Online publishing and archiving
As well as current volumes of the journal, you can also gain access to past volumes on the Internet via Emerald Management eJournals. You can browse or search these databases for relevant articles.

Key readings
This feature provides abstracts of related articles chosen by the journal editor, selected to provide readers with current awareness of interesting articles from other publications in the field.

Non-article content
Material in our journals such as product information, industry trends, company news, conferences, etc. is available online and can be accessed by users.

Reference linking
Direct links from the journal article references to abstracts of the most influential articles cited. Where possible, this link is to the full text of the article.

E-mail an article
Allows users to e-mail links only to relevant and interesting articles to another computer for later use, reference or printing purposes.

Structured abstracts
Emerald structured abstracts provide consistent, clear and informative summaries of the content of the articles, allowing faster evaluation of papers.

Additional complementary services available
When you register your journal subscription online you will gain access to additional resources for Authors and Librarians, offering key information and support to subscribers. In addition, our dedicated Research, Teaching and Learning Zones provide specialist “How to guides”, case studies, book reviews, management interviews and key readings.

E-mail alert services
These services allow you to be kept up to date with the latest additions to the journal via e-mail, as soon as new material enters the database. Further information about the services available can be found at www.emeraldinsight.com/alerts

Emerald Research Connections
An online meeting place for the world-wide research community, offering an opportunity for researchers to present their own work and find others to participate in future projects, or simply share ideas. Register yourself or search our database of researchers at www.emeraldinsight.com/connections

Choice of access
Electronic access to this journal is available via a number of channels. Our web site www.emeraldinsight.com is the recommended means of electronic access, as it provides fully searchable and value added access to the complete content of the journal. However, you can also access and search for full text of this journal through the following journal delivery services:

Digital divide – a challenge to the real estate practice in Nigeria?

Ayotunde Olawande Oni
Department of Estate Management, Covenant University, Ota, Nigeria

Abstract

Purpose – Digital divide is lack of access to and effective use of information and communication technology (ICT). It represents the difference between people with access to ICT and who use it effectively and those who do not. The aim of this study is to determine the level of digital divides amongst estate surveyors and valuers (recognized real estate practitioners in Nigeria). This is with a view to turning the identified digital divides into digital dividends for sustainable real estate practice in Nigeria and elsewhere.

Design/methodology/approach – In attaining the aim, primary data were collected on 3,627 corporate members of the Nigerian Institution of Estate Surveyors and Valuers (NIESV) with questionnaires administered through the internet using SurveyMonkey, an internet-based software complemented with bulk sms to alert them about posting of the questionnaires into their e-mail addresses. The Culbertson’s constructs for evaluating digital awareness in the USA were adapted for inclusion in the survey instrument. The finding on the estate surveyors and valuers was also compared with those on comparable professionals in the building industry in order to determine if the respondents are lagging behind in adopting ICT.

Findings – Based on the Culbertson’s constructs, there is great digital divide between practising estate surveyors and valuers and their counterparts in advanced countries. The analysis indicated that 33.75 percent of the respondents were not committed to ICT; 26.25 percent were slightly committed, and at least 38.75 percent were somewhat committed; and the respondents were classified as “low-tech high-touch” professionals; and their level of ICT deployment found to be appropriate within the framework of the Nigerian National Bureau of Statistics. This implies that digital divide is not a challenge to real estate practice in Nigeria.

Research limitations/implications – The study serves as good starting block for further analysis of the setting, challenges, and practice of real estate profession in Nigeria and elsewhere with regards to ICT applications. The research posited the implication for the NIESV to organize mandatory continued professional development workshops on ICT to remain relevant in the fast moving digital society. The IT requirements, current skill base, and curricula in the higher institutions were however not examined. It is therefore necessary to carry out further research on students and faculty in the higher institutions to identify the gaps in skill and technological capabilities.

Originality/value – The findings help in specifying development activities that will enhance improvements in professional standards, build local capacity and improve transparency expected by international investors. Also, the findings provide professional bodies and policy-makers with indicators to improve and ensure sustainable real estate professional practice through continuous and life-long training of members in ICT. It recommended capacity building, reviving of interests of practitioners, direct investment of software companies, and research as approaches to reducing the level of digital divide between practitioners in advanced countries and Nigeria in order to remain relevant in the technologically-driven and competitive world.

Keywords Digital divide, Digital dividend, ICT, Professional practice, Real estate, Technology, Nigeria, Communication technologies

Paper type Research paper

1. Introduction

The world has undergone a technologically driven revolution in the last decades; this has led to “the information age” associated with phenomenal proliferation of computers and information devices. Activities have been subjected to technology with varying access, willingness of individuals and the continent and between those within the settings. The gap that separated those who do not is referred to as digital divide. A digital divide is the difference between those who make use of ICT and those who do not. It generally encompasses the gap between the technology-gifted and the technologically-challenged, a lost opportunity for one reason or another. In fact, “The divide is also experienced by the digital divide amongst estate surveyors and valuers in Nigeria and elsewhere. From the findings, the estate surveyors and valuers were identified; and assessed their existence and experience (professional real estate practitioners) in ICT application, the outcome was examined; and the findings are recommended focusing on students and faculty in the study area.

2. Literature review

Earlier studies have been conducted in terms of ICT. For instance, the key role that professional organizations play in the technology-driven society. However, the shortcomings in the study area are numerous. This study aims to fill the gap.
Book review

Real Estate Markets and Sustainable Behaviour
Edited by Peter Dent, Michael Patrick and Ye Xu
Routledge
Abingdon
2012
237 pages
£24.99
Review DOI 10.1108/02637471311295432

Real Estate Markets and Sustainable Behaviour is written by three leading property academics at Oxford Brooks University in the UK, including Professor Peter Dent who has been a long serving member of Property Management's Editorial Advisory Board. The authors are all chartered surveyors and have considerable experience in academic research and graduate teaching in addition to industry advisory experience. This very desirable mix of academic rigour and industry experience is reflected in the practical nature of this book.

The book seeks to present an analysis of the property market, not only in terms of its commercial and legal aspects, but also with a focus on the growing importance of sustainability as a performance measure in contemporary property investment. It addresses both the investor perspective and that of the corporate occupier in their property dealings, not just in respect of financial performance but also from a social and environmental sustainability performance viewpoint.

While comprehensively covering the traditional property material that might be expected in a real property textbook, this text examines the complex nature of property rights and issues related to both investors and occupiers in a rapidly evolving market. The book is presented in four sections. The first deals with an overview of the real property markets and institutions involved in the market. The second section looks at property ownership vehicles and the investment decision-making process including analysis from a socially responsible and sustainable investment perspective. Section 3 takes a more holistic approach to sustainable property ownership with chapters dedicated to place making, balanced scorecard and business approaches to property. The final section reflects on the role of leadership in promoting sustainable business and property practices and provides a framework for evaluating learning of sustainable literacy and knowledge.

The target audience for this book is both property practitioners and students in property economics programmes. I can certainly recommend this text, particularly to those working in the sustainable property development field but also to all those with an interest in green building.

Clive M J Warren
Business School, University of Queensland, Brisbane, Australia
This very practical text reflects in the practical experience gained by the three leading property professors, including Peter Dent who is on the Editorial Advisory Board. Peter's experience in academic property investment, prestige occupier in their field of work, has set the standard for others, but also from a social science perspective. The material that might be complex nature of property investment, an overview of the real estate market, the growing importance of property investment, and the corporate occupier in their field of work, but also from a social science perspective. The second section looks at the retailing process including the role of the market and location. Section 3 introduces ownership with chapters on organizational and environmental sustainability, evaluating learning of practitioners and students in this text, particularly to read, but also to all those with proper education.

2012 Awards for Excellence

The following article was selected for this year’s Outstanding Paper Award for Property Management

“Housing affordability in Australia for first home buyers on moderate incomes”

Valerie Kupke and Peter Rossini

Abstract
Purpose This paper examines the opportunity for home ownership by first time buyers who are in occupations defined in the UK literature as key workers within four state capitals in Australia: Adelaide, Melbourne, Sydney and Brisbane. Many of these workers are moderate or average income earners who deliver essential community services such as health, social services, education, safety and emergency services. This paper explores access to home ownership for these workers for 2001 and 2009, a period which included the introduction and reintroduction of increased Australian government grants to first home buyers.

Design/methodology/approach The study determines, for each year, the zones of each city able to be afforded on a moderate single income as well as the percentage of suburbs able to be afforded by key workers.

Findings The paper identifies the pressure for multiple incomes in order to purchase as well as the commuting distances some workers in Adelaide and Sydney may have to accommodate in order to afford a home.

Originality/value Follows up 2001 work, conducted in Australia, on housing affordability for moderate income earners. Housing affordability continues to be a key housing issue in Australia, especially for first home buyers.

Smart and Sustainable Built Environment

Editor-in-Chief: Professor Jay Yang, Queensland University of Technology, Australia

An IAB-encouraged journal, Smart and Sustainable Built Environment (SASBE) covers multi-disciplinary and integrated approaches to developing smart and sustainable built environments. The objective of the journal is to identify, develop and promote research and practice in integration between innovation and sustainability. The journal highlights holistic problem solving and decision making, collaborative system and product development, innovative solutions enhancing sustainability, and mutually beneficial outcomes for all stakeholders of the built environment. It also gives an emphasis to international collaboration, emerging challenges, issues arising from developing economies, and knowledge transfer to businesses and industries.

The coverage of the journal includes, but is not limited to:
• Sustainable buildings, infrastructure, districts, cities and the community
• Smart and healthy workplace and living environments
• Innovative systems, technologies and products responding to emerging challenges
• Smart and sustainable design, construction, and operation of new built facilities and regeneration of existing ones
• Sustainable development processes, regulations, governance and community engagement
• Management of information and knowledge on innovation and sustainability
• Communication, education and training of sustainability principles and professional skills.

The Editor
Professor Clive Warren, UQ St Lucia, Qld 4072, Australia
E-mail: c.warren@business.uq.edu.au

Editorial objectives

The journal aims to provide current research and forward-thinking professionals in the field of property management, thereby providing opportunities for professionals to enhance their knowledge and skills.

Editorial scope

Written by researchers and forward-thinking professionals, the journal is an international forum in order to serve the needs of professionals in the field of property management.

The reviewing process

Each paper submitted to the journal is reviewed by two referees for double-blind refereeing. The Editor then decides whether the paper is suitable for publication.

Submission process

Submissions to Property Management should be submitted via the ScholarOne Manuscripts system available at: http://mc.manuscriptcentral.com

Registering on ScholarOne Manuscripts

If you have not yet registered on ScholarOne Manuscripts, please follow the on-screen instructions below:

- Click on the "create account" button
- Follow the on-screen instructions
- Your username will be your eight-character login name
- Click "Finish" and your account is created.

Submitting an article to Property Management

- Please go to Property Management and log in using your username and password
- (To consult the Author's Guide to Resources go here)
- Click on the Author Centre link
- Click on the submit a manuscript link
- Complete all fields and browse your manuscript
- When all required sections are complete, submit your manuscript.

Manuscript requirements

This manuscript will be considered in accordance with the requirements of the ScholarOne Manuscripts system. Please refer to the Author's Guide for Resources.

Authors must supply a structured abstract, including Keywords, which will be reproduced in the journal. The abstract should be no more than 150 words. The manuscript should be formatted in accordance with the guidelines provided by the journal.

For more information, please contact:
backfiles@emeraldinsight.com
www.emeraldinsight.com/backfiles
The journal aims to provide current information and research findings in the field of property management. The journal has adopted a wide subject remit and explores areas such as: landlord and tenant relationships, information technology, theory and practice of property management, legal considerations, the property market.

Editorial objectives

Written by researchers and academics it provides key information to researchers and forward-thinking professionals. It does not centre fully on UK theory and practice but aims to be an international forum in areas where transfer of thinking across national boundaries is feasible and relevant.

The reviewing process

Each paper is reviewed by the Editor and, if it is judged suitable for this publication, it is then sent to two referees for double blind peer review. Based on their recommendations, the Editor then decides whether the paper should be accepted as is, revised or rejected.

Submission process

Submissions to Property Management are made using ScholarOne Manuscripts, Emerald’s online submission and peer review system. Registration and access are available at http://mc.manuscriptcentral.com. Further information and guidance on using ScholarOne Manuscripts are available at the Emerald ScholarOne Manuscripts Support Centre: http://mc.manuscriptcentral.com.

Registering on ScholarOne Manuscripts

If you have not yet registered on ScholarOne Manuscripts, please follow the instructions below:

• Please log on to http://mc.manuscriptcentral.com
• Click “Create Account”
• Follow the on-screen instructions, filling in the requested details before proceeding
• Your username will be your e-mail address and you have to input a password of at least eight characters in length and containing two or more numbers
• Click “Finish” and your account has been created.

Submitting an article to Property Management on ScholarOne Manuscripts

• Please submit to Property Management at http://mc.manuscriptcentral.com with your username and password. This will take you through to the Welcome page
• (To consult the Author Guidelines for this journal, click on the Home Page link in the left-hand margin)
• Click on the Author Centre button
• Click on the submit a manuscript link, which will take you through to the Manuscript Submission page
• Complete all fields and browse to upload your article
• You must upload a maximum of two files – your article (without author details) and a separate title page (with all author contact details)
• When all required sections are completed, preview your pdf proof
• Submit your manuscript.

Manuscript requirements

The manuscript will be considered to be the definitive version of the article and should be in MS WORD format. Please use single line spacing to conserve paper during the review and production processes. The author(s) should be shown and their details must be printed on a separate contact page. The author(s) should not be identified anywhere else in the article. As a guide, articles should be between 2,000 and 4,000 words in length. A title of not more than eight words should be provided. A brief abstract (of no more than 200 words) should also be provided including full name, affiliation, e-mail address and full contact details. Manuscripts should be typed on one side only using 10 cm (4”) white margins. Leave a 10 cm (4”) margin at the top of the page and a 2.5 cm (1”) margin at the bottom of the page to allow for insertion of page numbers. Headings should be numbered and include page numbers. A list of references should be provided at the end of the article. The references should be numbered in line with the citation. Figures which cannot be supplied in as the above are acceptable in the standard image formats which are: .pdf, .ps, and .eps. If possible, figures should be submitted as high quality .eps files and, if possible, in .pdf or .ps format. All images, tables and figures should be numbered consecutively and have a short descriptive title. A legend should be supplied for each figure or table. Title pages should be prepared as above.

Conclusion

The journal is an essential reference tool for property management practitioners, academics and policy makers. It is the definitive journal for professionals involved in property management and is an essential reference tool for property management practitioners, academics and policy makers.
