DEDICATION

This research is dedicated to the Lord Jesus Christ who has been
sustaining me right from the time I was in my mother's womb.

LISTS OF TABLES

1. Distribution of Respondents by Age
2. Distribution of Respondents by Marital status
3. Distribution of Respondents by Sex.
4. Distribution of Respondents by Religion.
5. Distribution of Respondents by Educational Qualification.
6. Distribution of Respondents by Number of Children.
7. Analysis of variance (ANOVA) of respondents according to age range.
8. Analysis of variance (ANOVA) of respondents according to educational background.
9. Means, Standard Deviations and t-test value of respondents according to Marital status
10. Means, Standard Deviations and t-test value of respondents according to religion.
11. Means, Standard Deviations and t-test value of respondents according to sex.
12. Means, Standard Deviations and t-test value of respondents according to Number of children.

CHAPTER ONE

INTRODUCTION

Background to the Study

Every family all over the world rejoices at the birth of a healthy baby. As a matter of fact, the conception of a baby is usually received as a miracle to the parents. It is recorded in the Bible that children are an heritage of the Lord. In our traditional Nigerian Society, children are referred to as the future of the nation and there is a necessity to cater for their well-being. Children in various homes are the source of life and hope of the parents.

Parents play various roles in the well-being of their children. Specifically, the mother is seen as the one who really influences the life of the children in the family. This is because She is the first person to teach, instruct and direct the children from birth. Despite the love and care parent have for their children, there are some hardship the children encounter.
